Hook Lift Skip LVL is simple, flexible and economic with regard to operating a skip loader and hook loader on the same chassis. With our low hook lift and a VL skip loader model with retractable arms, you get the perfect solution.

Load Changer Lift LVL

- 12, 14 and 18 metric tons lifting capacity.
- Adapted for 3 and 4 axle chassis.
- The hook height complies with both SMS and DIN standards and suits most hook lifts available on the market.
- Electronic pneumatic cab operation with 2 metre cable for lift and tip hook functions.
- Radio controlled with 2 speeds, one-handed operation, emergency stop and holder with integrated charger available as an option.
- Integrated cross member design gives a build height of only 205 mm.
- Robust design for increased strength and long life.
- Extensive equipment range designed for just your requirements.
- As a customer you benefit through many years of profitable ownership.

Our products have always promoted safety and user friendliness. The load changer lifts include numerous parts and components that increase safety for the driver and facilitate operation.
