Hook Lift S 10-12 is a flexible, easily operated and fast hook lift. Our design offers one of the lowest build heights and self-weight available on the market today while the lowered tip axle increases the lifting force.

Hook Lift S 10-12

- 10 and 12 metric tons lift and tip capacity.
- Adapted for 2 axle chassis.
- The hook height complies with both SMS and DIN standards and suits most hook lift bodies available on the market.
- Automatic lowering brake that dampers the speed during the final phase of the lowering movement.
- Robust design for increased strength and long life.
- Extensive option range designed for just your requirements.
- Prepared for Cameleont swap system.
- Apart of our construction concept FBS, which comprises corrosion-resistant products (ready-painted during assembly). FBS also gives shorter lead times.
- As a customer you benefit through many years of profitable ownership.

Options

- Radio remote control
- Crane platform studs
- Tank, valve and tool brackets
- Impact tested head board
- Sleeves in the head board
- Tailgate opener
- Hydraulic container lock

Our products have always promoted safety and user friendliness. The hook lifts include numerous parts and components that increase safety for the driver and facilitate operation.
